AVEVA Security Bulletin LFSEC00000126

**Title**
InTouch Access Anywhere Insecure 3rd Party Library usage

**Rating**
Medium

**Published By**
AVEVA Software Security Response Center

---

**Overview**

AVEVA Software, LLC. ("AVEVA") has created a security update to address an outdated and insecure 3rd party library used in:
- InTouch Access Anywhere 2017 Update 2 and older

The vulnerability, if exploited, could result in a Cross-Site Scripting injection and execution.

---

**Recommendations**

Customers using InTouch Access Anywhere 2017 Update 2 or older are affected and should upgrade to InTouch Access Anywhere 2017 Update 2b.

---

**Vulnerability Details, Characterization, and CVSSv3 Rating**

The vulnerability exists in jQuery v2.1.4, a 3rd party open source library used by InTouch Access Anywhere. Please refer to jQuery [CVE-2015-9251](https://cve.mitre.org/cgi-bin/cvename.cgi?name=CVE-2015-9251) for further details.

---

**Security Update**

The following Security Update addresses the vulnerabilities outlined in this Security Bulletin:
**July 20, 2018: InTouch Access Anywhere 2017 Update 2b**

Cyber Security Standards and Best Practices

For information regarding how to secure Industrial Control Systems please reference NIST SP800-82r2.

NVD Common Vulnerability Scoring System (CVSS v3)

The U.S. Department of Homeland Security has adopted the common Vulnerability Scoring System (CVSS v3) that provides an open framework for communicating the characteristics and impacts of IT vulnerabilities. CVSS v3 produces a numerical score as well as a textual representation of that score reflecting the severity of a vulnerability. Scores range from 0.0 (no impact) to a maximum of 10.0 (critical impact with minimal effort to exploit). For additional information please refer to the CVSSv3 specifications.
