

Wonderware Security Advisory

Title

Wonderware Products Default Administrator Credentials (LFSEC00000112)

Rating

Medium

Published By

Wonderware|Schneider Electric Security Response Center

Overview

In January 2016, Russian Security Researchers published a list of SCADA system default Administrator credentials at GitHub that includes the Wonderware products InTouch, Historian, and ArcestrA System Platform. The Security Researchers did not contact Wonderware|Schneider Electric in advance of the posting and we are issuing a Security Advisory to all customers to follow our recommended security best practices.

The rating is Medium.

Recommendations

The Wonderware products InTouch, Historian, and ArcestrA System Platform all provide administration utilities to change any default Administrator account credentials. We strongly encourage customers to change any default Administrator account credentials as instructed in the products' end user documentation and administrator guides.

Additionally, we strongly encourage you to download and review the [Wonderware Guide to Securing Industrial Control Systems](#). This is a security best practices guide for securing your system from potential threats.

Other Information

Support

For information on how to reach Schneider Electric support for your product, refer to this link: [Schneider Electric Software Global Customer Support](#). If you discover errors or omissions in this Advisory, please report the finding to support.
